Why, AI.

BUSTED MYTH

AI understands me, but I can't understand it!

AI is NOT smarter than us
AI should be understandable and accessible
BUSTED
MYTH

AI black boxes, personalised news feeds, all-knowing assistants? ...Not quite

Unequal impacts put extremely high stakes on AI's "misunderstandings"

$$y_1 = f_1(w_{(x1)1}x_1 + w_{(x2)1}x_2)$$

Artificial intelligence is just a lot of decisions made very quickly.
Math isn't magic.

AI isn't more rational or emotionless, but just as human as any decision-making—amplified at scale.

AI should be understandable and accessible. AI should work for us—all of us.

INTERSECTIONALITY MADE EASY

Dana Chan for Disabled And Here

Changing the conversation around AI
Call to Action: Understand AI

1. **Don't be intimidated!**
   AI is for anyone

2. **Don't be fooled!**
   AI is not rational, magic, or human-free

3. **Do pay attention to language**
   AI is not "understanding" the same way you do

4. **Do ask "Who is included? Who is left out?"**
   AI is for everyone; is everyone helped by it?
