

Information on data protection for applications submitted responding to the call for projects as part of the Impact AI research project

Institute: [Alexander von Humboldt Institut für Internet und Gesellschaft \(HIIG\)](#)

Research Project: [Impact AI](#)

Duration: January 2025 – December 2029

The Impact AI project is looking for AI use cases which are interested in participating in an impact assessment based on the Impact AI method and therefore opens a call for applications. This is part of a scientific impact assessment to research AI projects that aim to have an impact on the public interest and in pursuit of sustainability goals.

Your application to this call for projects as well as the submission of data and information is voluntary. Your data and information given (hereinafter “responses”) for the application will be processed as part of the Impact AI project. The responses will be made available to the project's team of researchers under the direction of Dr. Theresa Züger for selecting AI use cases to be part of the impact assessment.

Only the scientists on the project team under the direction of Dr. Theresa Züger and individuals at the project partners Greenpeace and the Economy for the Common Good e.V. (namely: Jonathan Niesel, Dr. Rolf Sohrmann and Timm Jelitschek) have access to the responses. We use [Tally](#) as our processor; for more information on their processing please see [Tally's privacy policy](#).

The responses contain contact details relating to the applying AI use case as well as details on the AI use case (in particular, a description of the AI use case, its goals and duration, and the motivation to participate in the impact assessment as stated by the applicant).

The responses will be exclusively used for the application and the process of selecting the AI use cases that will be part of the impact assessment.

The responses will be stored for the duration of the Impact AI research project and then deleted. Personal data will neither be published nor made available to third parties at any time.

Legal basis for data processing

The legal basis for the processing of personal data is Article 6(1)(f) of the EU General Data Protection Regulation (GDPR); the legitimate interest of the responsible party is to conduct scientific research.

Your rights

You have the right to request information as to whether the personal data in question is being processed. If such processing of personal data is conducted, you can request information from the controller about the purpose for which your personal data is processed, the category of personal data, the recipients or categories of recipients to whom your personal data has been disclosed and the planned duration of the processing of your personal data. You can assert your right to rectification or

erasure of the personal data concerning you with the controller at any time and/or object to or restrict the processing of your personal data with the controller.

The controller within the meaning of the EU General Data Protection Regulation (GDPR) is the Alexander von Humboldt Institute for Internet and Society gGmbH (HIIG), Französische Straße 9, 10117 Berlin. The institute's data protection officer is Dr. Jörg Pohle (dsb@hiig.de).

You also have the right to file a complaint to a supervisory authority, in particular in the Member State of your residence, your place of work or the place of the alleged infringement, if you believe that the processing of your personal data violates the GDPR. The data protection supervisory authority responsible for HIIG is the Berlin Commissioner for Data Protection and Freedom of Information, Alt-Moabit 59-61, 10555 Berlin, website: <https://www.datenschutz-berlin.de>, e-mail: mailbox@datenschutz-berlin.de.
